**Updated Other Contaminant**

**Notes:**

Arrived on location at 10:30. 25 degrees F, mostly cloudy, NW wind 15-25 mph. Walked the perimeter of the well pad and took photos. Did not note any areas with petroleum-impacted vegetation. It appeared that the release may have occurred in the NE corner of the site with slightly disturbed vegetation in an area approximately 50' by 60'. Follow up in spring 2016 for confirmation observations.
